

CS290 Project Proposal

Hudson Dean

Description:

My project will be used as my personal website that showcases my computer science skills and links to my previous programming projects. I want to use this website as a professional website to advertise my programming experience.

Theme:

The website will have a professional theme. This will include standard and easy to read fonts, simplistic navigational methods, and links to my programming projects and other public/professional links.

Content:

My vision for the website is to have a the following pages that use HTML/CSS/JavaScript.

Main Page:

Basic information about myself in a scroll box. Links other pages together. Carousel animation that has pictures of myself and my projects.

Projects Page:

Contains links to my other programming projects. Unordered list of my programming skills. Has pictures or videos of my working projects.

Resume Page:

Contains a downloadable file to my resume. Contains a link to my linkedin.

Contact Page:

Contains a form that the user input their information and is sent to my personal email.
